Project Overview

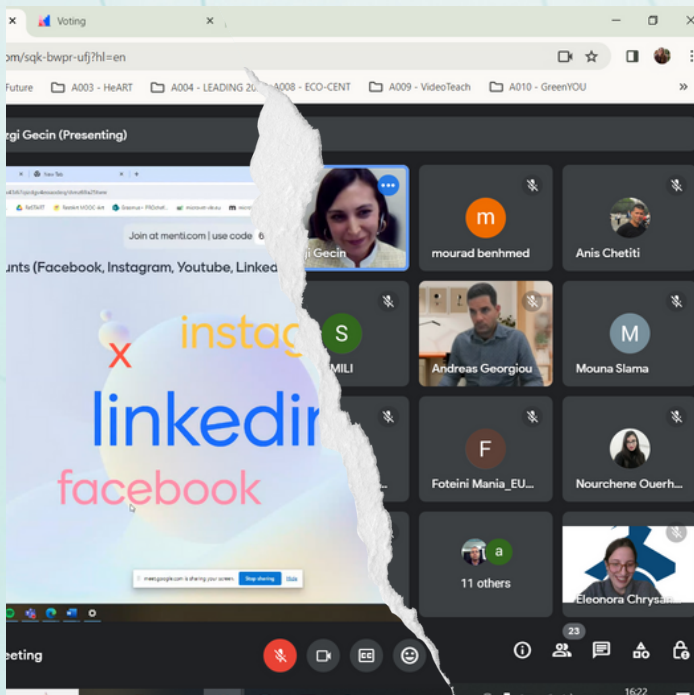

The digitalization of the VET industry is critical, particularly in Tunisia, where a skills gap persists, leaving many young graduates lacking the digital competencies required by the labor market. To address this difficulty, the DISCOVER project, as part of the Torino process, seeks to modernize VET provision by increasing Continuing Professional Development for VET instructors and trainers.

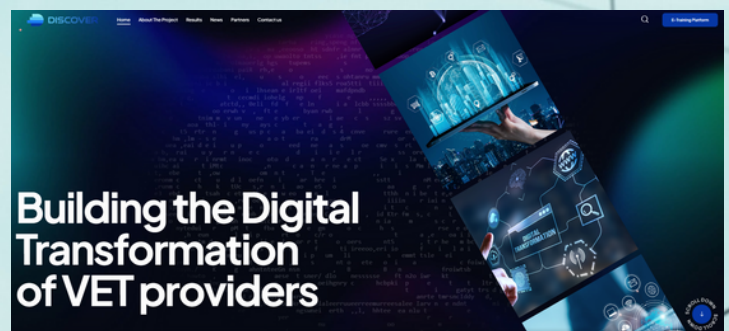

Latest updates

Online Kick-off Meeting: On January 15, 2024, partners from Cyprus, Greece, and Tunisia met online to start off the project. CARDET, the project coordinator, presented important project objectives, funding regulations, and next stages.

Eurotraining featured diffusion and exploitation techniques, as well as voting possibilities for the project's social media accounts and logos.

Project Website Launch: A website has been created to give stakeholders with access to project information and updates.
